Fully Automatic Multimode Electronic Charger

Intelligent chargers follow battery impedance to end of charge cycle for all battery types. Fully automatic.

- Current limiting.
- Can be set for any type lead acid battery, including conventional, maintenance free, deep cycle, gel-type, valve regulated batteries.
- Cyclic Voltage: Flooded 2.47 volts/cell; Gel & AGM 2.4 volts/cell. May be preset to customer’s specification for battery type.
- Not intended for use as a DC power supply.
- Continuous - 100% duty cycle.
- Can be used for any type lead acid battery, including conventional, maintenance free, deep cycle, gel-type, valve regulated batteries.

- Red LED indicates AC power on. Yellow LED indicates battery is charging. Green LED indicates float mode.
- Fully automatic 3 stage charger can be left on the battery in maintaining/float mode.
- Charge control: constant current charge to a constant voltage, then to a float standby voltage.
- Current limiting.
- Fully automatic 3 stage charger can be left on the battery in maintaining/float mode.
- Red LED indicates AC power on. Yellow maintaining at 2.5 amp. Green maintaining at 1 amp or less.
- Can be used for any type lead acid battery, including conventional, maintenance free, deep cycle, gel-type, valve regulated batteries.

- Reverse polarity and short circuit proof.
- Aluminum case.
- AC Input 115/230 volts, 50 or 60Hz Input voltage autosensed.
- Reverse polarity and short circuit proof.
- AC cordset length, 6 feet. DC cordset length, 4 feet with battery clips.
- Aluminum case.
